Regulation EG Nr. 1907/2006 Regarding the Registration, Evaluation, Authorization and Restriction of Chemicals (REACH) of 14th, June, 2023

We are downstream users within the meaning of the REACH regulation (Downstream User). According to article 33 of the Reach regulation, product suppliers must inform the customer whether substances from the Reach candidate list (SVHC-list) are greater than 0,1% weight potential.

The following materials contain Lead (Pb), CAS number: 7439-29-1, a substance of very high concern:

- CuZn36Pb3
- CuZn39Pb2
- CuZn39Pb3
- CuZn38Pb1,5
- CuBe2Pb (BeCu33-25)

We could send information of the chemical composition and safe handling of these materials. If you need a Product Information Sheets, please contact via email: marcus.sulfrian@rst-wire.de

Our products do not contain any of the listed substances according Appendix XIV.

In our view, we can confirm that everything has been done to maintain the supply chain. In the future you will be continued to be reliably supplied by Richard Stenzhorn GmbH.

We hope to have given the necessary clarity in this issue. At the same time, we want to use this document to help further strengthen our mutual cooperation.

For questions about the implementation of REACH in our company, we are at your disposal.

With kind regards

Christoph Silvanus
Managing Director

Markus Matschuck
